

## Driver's License Image Capture Add-On

- Sell More
- Lower Costs
- Improve Customer Satisfaction
- Reduce Errors
- Get Paid Faster

Driver's license scanning is becoming a necessity in today's rental industry. The flexibility to obtain and view scanned ID information and image continues to grow within integraRental. This premium feature from integraSoft is aimed at making your rental business more efficient, more profitable, and better protected than ever. Contact our team to get a quote and upgrade to the integraRental ID scan experience today!

### ADVANCED CUSTOMER VERIFICATION

- Improve customer verification with captured ID image visibility at customer selection.
- Empower customers with the ability to upload ID images online, pre-rental, through both Pay & Sign and eRental checkout.
- Utilize AI technology to scan ID information which is then collected and stored securely inside of integraRental.
- Access ID images stored within integraRental on rental agreement and customer profile views.
- Take and upload ID images on-the-go with the integraRental mobile app, keeping business running from anywhere, at any time.

Driver's License Image Capture requires use of an ID Scanner device, sold separately. Contact your sales rep for more information.

### ENHANCED DRIVER'S LICENSE SCANNING & STORAGE

- integraRental can easily capture in-person driver's license images via our mobile app or through ID scanning hardware (*pictured above*).
- Set up new customers faster than ever with driver's license scanning that is both quick and accurate.
- Collect even more pre-rental information from your customers, simplifying the yard experience.
