

Avalara: Tax Compliance Software

-  Sell More
-  Lower Costs
-  Improve Customer Satisfaction
-  Reduce Errors
-  Get Paid Faster

integraRental has partnered with Avalara, the leader in sales tax management software for rental companies. Avalara automatically completes sales tax calculations and filings in minutes, eliminating the opportunity for errors. Process full transactions in a single, unified system and put your sales tax management on autopilot. Simplify your tax management efforts and contact our team for a quote and demo today!

TAX CHALLENGES FACING COMPANIES TODAY

- In the 2018 South Dakota v. Wayfair ruling, the Supreme Court ruled that states can apply their sales tax laws to out-of-state retailers even if the retailer has no physical presence in that state.
- Now, economic nexus can be established based on number of transactions or revenue from products sold in that state, requiring businesses to collect and remit sales tax to those states.
- Each state has also created their own sales tax laws, creating different nexus thresholds, marketplace facilitator rules, and rates based on the location and product categories.

AUTOMATED TAX APPLICATION AND REPORTING

- Save time by eliminating the need to manually file and remit, enter data, and upload rate tables and tax information.
- Accurately apply the correct tax rate for each customer, regardless of their location or sales channel.
- Seamlessly report and file accurate sales tax to every state in which your business has nexus, ensuring your books are accurate in the case of an audit.
- 24/7 access to sales tax history and reports ensures that you have the info you need, when you need it.
