

Parts Procurement for integraRental

- Sell More
- Lower Costs
- Improve Customer Satisfaction
- Reduce Errors
- Get Paid Faster

Streamline equipment maintenance and parts procurement by connecting your rental fleet directly to a global network of over 650 OEM brands. This powerful integration eliminates manual data entry, reduces equipment downtime, and ensures your service technicians have instant access to the exact parts and diagrams they need to keep your fleet in top condition.

SIMPLIFIED PARTS PROCUREMENT & WORK ORDERS

- Access parts catalogs for each of your assets and find real-time, serial-number-specific catalogs and technical diagrams, ensuring a reduction in the ordering of incorrect parts and the downtime that creates.
- Reduce the time assets spend in the shop by simplifying the “find and buy” process for maintenance parts and supplies.
- Gain real-time visibility into parts availability and pricing, enabling your team to make faster, more informed repair decisions.

The screenshot displays the 'F1-4-1 KNUCKLE & TRACK ROD INSTALLATION' page. It features a 'Diagram' tab and a 'Part-List' tab. The main area shows a detailed technical drawing of the assembly with numbered callouts. On the right, a 'Selected Parts' sidebar includes an 'Add to Current Cart' button and a 'Go to Cart' button. A 'JCB Inc(3)' notification is visible in the bottom right corner. A logo for 'integraRental + SE SMARTEQUIP' is overlaid on the bottom right of the screenshot.

IMPROVED OPERATIONAL EFFICIENCY

- Empower service technicians to order parts directly from the shop floor, removing bottlenecks and consolidating purchasing workflows into a single platform that connects your shop, office, and suppliers.
- Lower administrative costs and time sinks by automating the reconciliation of invoices and parts receipts between your rental software and vendors.
- Stay current with the latest technical service bulletins and parts updates provided directly by OEMs through the connected SmartEquip network.
